TO MANUALLY INSTALL YOUR PEUGEOT / CITROËN ALERT ZONE

1. Identify if your system is equipped with a USB port compatible with the installation of Peugeot / Citroën Alert Zone. If your system does not have a compatible USB port, your system must be updated by CD-ROM.

2. Copy the downloaded file to the media (CD-R or USB flash drive)

a. For updating by CD-ROM
   i.   Insert a re-writable CD-R in your computer's CD drive (burner)
   ii. Locate the downloaded .ISO file on your computer
   iii. Burn the downloaded .ISO file using your burning software, or, for operating systems with built-in burning functionality, right click the .ISO file and select "Burn". We recommend burning the CD at the lowest supported burn speed.

b. For updating by USB flash drive
   i.   Extract the content of the Peugeot Alert Zone ISO image file or the folders in the zip file by using a specific utility (for example WinRAR.
   ii. Copy all the extracted files, respecting the tree structure, to the root folder of the USB flash drive, overwriting all existing Peugeot / Citroën Alert Zone files.
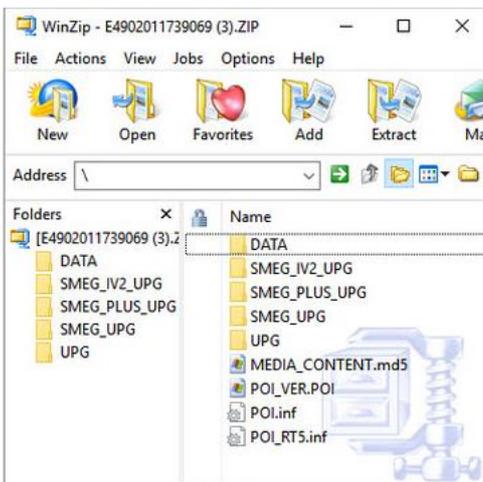

3. Go to your vehicle with the updated CD-R or USB flash drive.

4. Start the engine of your vehicle as you must carry the update with your engine running.

5. Insert the media (CD-R or USB flash drive) into the navigation system and follow the instructions.

a. The system will automatically detect the inserted media.

6. Confirm that you wish the update to start by clicking "YES".

a. The update takes place automatically.

b. When the update has finished, a message notifies you that the Peugeot Alert Zone database has been added.

7. Remove the media (CD-R or USB flash drive) from the navigation system to end the process.

Have nice journeys!
